

FRI™

Open, soft and simplicity itself - the lounge chair Fri™ was created by Jaime Hayon to represent exactly this. Fri is the Spanish designer's take on an extrovert chair, with the ambition of delivering a comfortable seat with a sculptural look, pleasing the body as well as the eye. Immerse in its curves, dive into its comfortability and create an open space with a welcoming feel with Fri.

REPUBLIC OF **Fritz Hansen**®

PRODUCT DESCRIPTION

Fri™ is designed to create a cosy feel in any setting. Of course, it takes more than a chair to create that ambience, but Fri is a first step towards bringing this exceptional atmosphere into your life, as Fri is designed to put you in the mood for connecting with others and to contribute a pleasant and open atmosphere.

Fri creates a space where you can feel relaxed and comfortable without feeling withdrawn or unapproachable. Where you can spend quality time and take part in the meaningful moments of everyday life at home, at the office or in a restaurant.

The shell of the chair is created in hard polyurethane foam with glass fibre re-enforcement of the edges as with the Egg™ and the Swan™. The footstool has a bottom plate made of MDF on which the seat cushion is mounted. The seat cushion for both the chair and the footstool is made of moulded polyurethane foam to achieve the right form and comfort. The back cushion on the chair is made of two slices of soft foam with a lumbar support to increase economy and comfort.

The base comes with four legs made of satin brushed aluminium or with a wooden base/legs in oak. Each leg has mounted nylon glides, suitable for a majority of floors.

DESIGN

Jaime Hayon, 2015.

JAIME HAYON 1974-

Spanish artist/designer Jaime Hayon was born in Madrid in 1974. As a teenager, he submerged himself in skateboard culture and graffiti art, which formed the detailed, bold yet whimsical imagery so prevalent in his work today.

In 1997, after studying industrial design in Madrid and Paris, he joined Fabrica, the Benetton-funded design and communication academy, working closely with the legendary image-maker and agitator Oliverio Toscani.

After a short time he was promoted from student to head of their Design Department. Eight years later, Jaime broke out on his own, first with his collections of designer toys, ceramics and furniture, then followed by interior design and installations.

UPHOLSTERY

Fri™ is presented in a collection of unique Designer Selections colours.

ENVIRONMENTAL PRODUCT INFORMATION

Lounge chair and footstool for meetings, lounges and private use.

MATERIALS

Shell

The shell is made of hard polyurethane (PUR) foam with an embedded steel frame as well as glass fibre re-enforcement of the edges. The shell is additionally reinforced with a wood frame in the seat area. The seat cushion is made of moulded PUR foam and the back cushion is cut from plates of foam.

Base

The base is available in brushed aluminium legs or with a wooden base made of oak. The legs are attached to the shell with screws.

Upholstery

- Foam is PUR
- Several textiles are available with EU Ecoflower mark
- A water-soluble glue is used for bonding of textile to the foam

Materials in %

The below figures illustrate the weight allocation between the different materials used. Items with a weight <1% of the total product weight are not included in the figures below. The upholstery percentage may vary depending on the upholstery type.

PACKAGING MATERIAL

The lounge chair is covered with a plastic bag and PE foam and shipped and protected in cardboard. All packaging material can be recycled

REPAIR, DISPOSAL AND REUSE

In the case of disposal the lounge chair can be disassembled into different parts (shell, loose cushions and legs) for recycling, special handling and repair. The shell requires special handling because of the embedded veneer and steel frame. The foam in the loose cushions can be granulated and re-used. The legs and all other metal parts can be recycled.

MANUFACTURING PROCESSES

Suppliers

Suppliers environmental stance is examined as part of Fritz Hansen's Quality and Environmental Management Systems before Fritz Hansen enters into cooperation with a supplier.

Foam

Remnants from foam production are granulated, wherever possible, for recycling.

Metals

Production scrap (steel and aluminium) is collected for recycling.

Plastic

Plastic components are identified with a recycling code whenever possible to facilitate the return of the materials to the recycling stream

MANAGEMENT SYSTEMS

Environmental Systems

We are aware of our environmental responsibilities. Therefore, in the autumn of 2004 Fritz Hansen obtained the ISO 14001 certification in the environmental management system. The certification is a guarantee to our customers and the authorities that we comply with the requirements of the ISO 14001:2015 standard.

Quality System

Fritz Hansen is also certified according to the quality system ISO 9001:2015.

Employee Health and Safety

Fritz Hansen aims at meeting or exceeding OSHA standards.

ENVIRONMENTAL PRODUCT CERTIFICATION

GreenGuard

The Fri™ chair is GreenGuard Gold certified. GreenGuard certification is an emission certification for indoor air quality. Products with ultra-low-emitting materials can achieve GreenGuard Gold.

LONG LIFETIME

A long lifetime of a piece of furniture is an important environmental factor. Fritz Hansen aims to obtain a long lifetime through timeless design and strict requirements for strength, durability and stability. The lounge chair complies with the requirements for EN 16139 Non domestic seating - Test Level 2.
