

NEU 12

DESIGN BY HAY

Neu 12's ergonomically moulded shell is reinforced with an aluminium construction under the seat to provide extra strength and durability. The finely-grained plastic adds textural interest, while the rim detail gives the design structure and solid wooden legs complete the perfectly defined profile. In the upholstered version, a delicate stitching line runs across the seat, while a piping detail accentuates the chair's raised rim. Its robust, comfortable structure and flexible design options make it the ideal choice for both private and public environments.

PRODUCT DETAILS

- / Robust and comfortable chair in a variety of shell colours and base finishes.
- / The chair is reinforced with an aluminium construction under the seat to provide extra strength and durability.
- / Variety of shell colours and base finishes.
