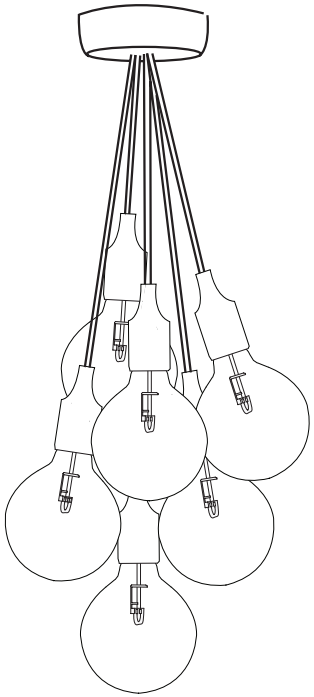
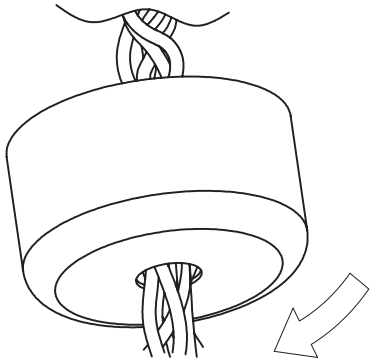
E27 MULTIPLE CANOPY



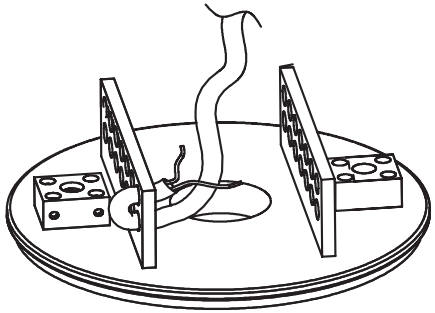
MUUTO
New Nordic

1



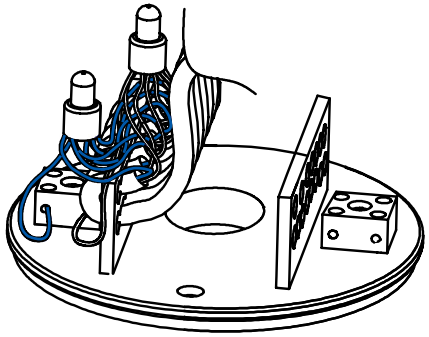
Decide the cord lengths of the E27 lamps going into the canopy.

2



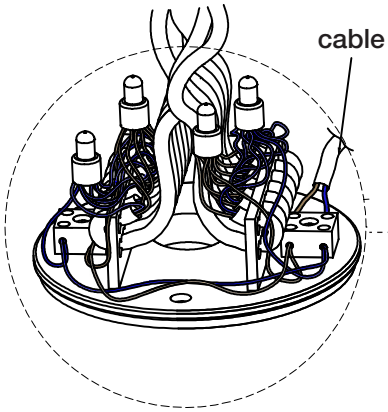
Insert the cords through the canopy holes and cut the cords at the right length, leaving out the inside cables. Leave approx. 5 cm. for installation.

3

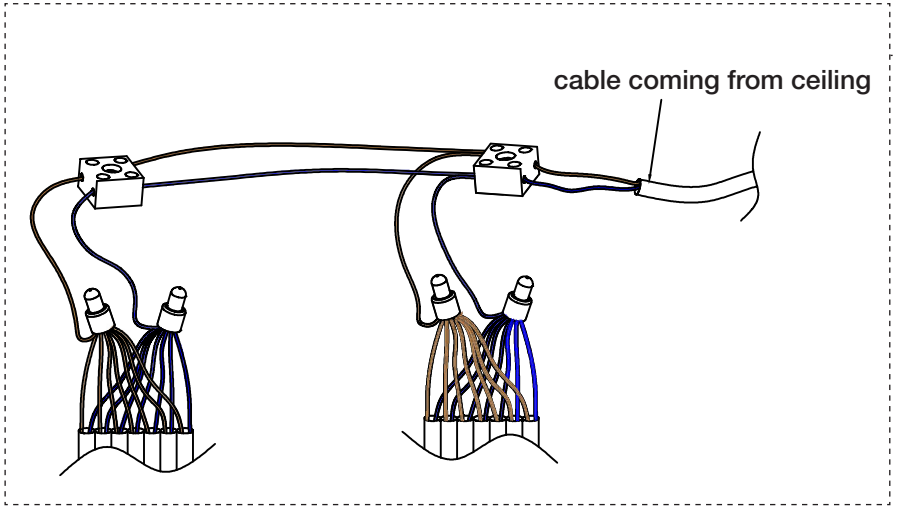


Connect all blue cables using the connecting device, making sure that all cables are touching each other inside the connecting device.

4



Attach the single blue cables to the terminals and tighten the screws.
Repeat with the single brown cables.



Close-up of terminals
