# USER MANUAL MARBLE TABLES

---

During unpacking the frame, please remove the 3 black plastic "feet". These are only for protection during transport.

The marble table is delivered unassembled. When you assemble the marble table, the marble top should be carefully lowered into the frame to avoid scratches on the painted frame. Plastic dots (3 pcs) can be used to level the marble top in the frame, since the marble top can vary in thickness.

Please note: The marble top must be handled with the outmost care to avoid breaking or cracking as marble is a delicate and porous material.

We recommend that regular cleaning is as gentle as possible. Dust off the surface on a regular basis and wash the marble with a damp cloth when needed. If necessary, you can add a bit of mild dishwashing detergent. Remove the soap with a clean damp cloth.

Never use dusting sprays or abrasive cleaners on your marble.  
To refresh the stone's luster, we recommend marble polish.  
To prevent ring marks, use coasters under glasses etc.

Always clean up spills immediately.  
Be careful with hard objects that might scratch the surface as the marble is a delicate and porous stone.

ferm LIVING shall not be responsible for any damages caused by improper handling or treatment.
