

## Gradisoffitto

halogen energy saver

Halogen free standing, wall, ceiling and desk lamps for interiors. Consisting of a cylinder made of highly heat-resistant glass treated with special enamels, the lighting body takes care of the various different functions of reflector, antiglare shade and bulb protection in one piece. A wide variety of layouts can be achieved by orienting the semicircular support through 90° and the reflector itself through 360°. No tools are needed to replace the bulbs.
